ROCE, Equity Ratio and Leverage Development

BALANCE SHEET OVERVIEW AS OF SEPTEMBER 30, 2023

COMMENTARY

- ROCE continued to improve, reaching 20.0% as of September 30, 2023, compared to 18.3% at year-end. The strong growth in adj. EBIT is the main driver for this development.
- Equity ratio improved to 37.5% compared to year-end (35.9%), supported by strong operating results and growing net income.
- Liquid assets increased to €87m as of September 30, 2023, compared to year-end (Dec. 31, 2022: €81m), driven by an excellent free cash flow development (€ +56m).
- Despite dividend pay-out of €21m in Q2 2023 and the debt-financed acquisition of Crenlo do Brasil and LH Lift in Q3 2023 (€56m), net debt increased only slightly to €226m compared to year-end (Dec. 31, 2022: 197m)
- Leverage improved to 1.26x despite the debt-financed acquisitions in Q3 2023 (Dec. 31, 2022: 1.28x)

¹ ROCE=LTM adj. EBIT / interest-bearing capital employed (interest-bearing capital = equity + financial liabilities [excl. refinancing costs] – liquid assets + provisions for pensions)

² Net debt = interest bearing capital [excl. refinancing costs] – liquid assets

³ Leverage = Net debt/LTM adj. EBITDA [LTM adj. EBITDA = € 179m; LTM adj. EBITDA PY = € 148m]

Cash Flow and Working Capital Development

CASH FLOW OVERVIEW IN Q3 2023

¹ Free cash flow = Operating cash flow – capex

² Cash conversion = Free cash flow/adj. net income

³ Capex = Payments to acquire property, plant and equipment + payments to acquire intangible assets

COMMENTARY

- The operating cash flow continued to improve significantly during Q3 2023, driven by the good development in working capital. This resulted in a positive free cashflow of € +23m. Cash conversion rate improved further as a result and is back on the +1.0 range (Q3 2022: +0.7).
- Capex (excluding M&A) declined to €6.3m and was at 2.1% of total sales. The prior year's quarter marked the begin of investments for the construction of the new production plant in Chennai, India, which was completed and went into operation in Q3 2023.
- Inventories went down further by €21 compared to Q3 2022, despite the first-time consolidation of Crenlo do Brasil and LH Lift. This improvement was due to internal measures to reduce working capital.
- With supply bottlenecks easing further, the need for additional safety stock continued to shrink, resulting in a further decrease of trade payables year-on-year. Trade receivables declined compared to prior year, driven by the decreasing sales in agriculture.
- Overall, NWC as % of LTM sales went down to 20.4% in Q3 2023, slightly above the year-end target of ≤20% of sales.

Development of JOST's Sales and Adjusted EBIT by Quarter

JOST achieved a strong adj. EBIT margin in the third quarter of 2023, despite strong decline in Agriculture and negative currency effects leading to a decline in sales, compared to Q3 2022.
